Restriction to one of the following inventions is required under 35 U.S.C. 121:

information equipment through a communication channel, classified in class 705, subclass 34.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I. – V. are related as subcombinations discloses as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. Each invention has separate utility, as shown above.

See MPEP 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for each separate group is not required for any other group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
